

Master Details Report using Group Link

Steps to create the Report :

1. Create Data model with two Data Sets
 - i. PO_HDR (G_1)
 - ii. PO_LINES (G_2)
2. Create Group link from G_1 to G_2 in Data Model
3. Save Sample Data
4. Create Report and the Layout
5. Test the Report Output

-- Query for Open Standard PO with Suppliers (PO_HDR)

```
SELECT POH.po_header_id PO_HDR_ID
      , POH.segment1 PO_NUMBER
      , POH.document_status PO_STATUS
      , POH.type_lookup_code PO_TYPE
      , PS.segment1 SUPPLIER_NUMBER
      , HP.party_name SUPPLIER_NAME
FROM   po_headers_all POH
      , poz_suppliers PS
      , hz_parties HP
WHERE  POH.vendor_id = PS.vendor_id
      AND PS.party_id = HP.party_id
      AND POH.type_lookup_code = 'STANDARD'
      AND POH.document_status = 'OPEN'
      AND PS.segment1 = 1255
```

-- Query to find PO Lines against a PO Header (PO_LINES)

```
SELECT POL.po_header_id PO_HEADER_ID
      , POL.po_line_id PO_LINE_ID
      , POL.line_num PO_LINE_NUM
      , POL.line_status PO_LINE_STATUS
      , POL.item_description PO_ITEM
      , POL.uom_code ITEM_UOM
      , POL.unit_price ITEM_UNIT_PRICE
      , POL.quantity ITEM_QUANTITY
FROM   po_lines_all POL
WHERE  POL.po_header_id = :po_hdr_id
```
